About The Position

Job description

The Ab Initio Senior Designer/Developer will be responsible for working with our leading on-site consultants at as a hands on developer working on strategic design and development projects using the latest technologies from Ab Initio corp. (AI) THIS IS NOT A PROD SUPPORT POSITION. (hands-on developers only to apply)

The candidate must be able to successfully communicate with internal teams as well as client personnel in order to deliver industry-leading solutions, detailed functional designs and complex application implementation components throughout the entire lifecycle of the project. Using the latest Ab Initio technologies (and , Continuous Flows, ICFFs, Meta-Hub, Express> It, Micrographs, Web Services, EME, etc.) Work with Hadoop HDFS file system is also a strong plus. (not connecting to Hadoop, but running AI natively on Hadoop)

Responsibilities:

Lead or participate in the definition, execution and communication of ETL strategy and technical solution

Development of data staging, architecture and consuming internal and external application interfaces

Cooperate with business and operational users, other data management staff and infrastructure teams to ensure adherence to client and company guidelines, restrictions and requirements as well as industry standards

Efficient assessment and resolution of complex technical design issues

Provide project team with leadership and guidance on defining, monitoring and managing business data quality and ETL operational metrics

Responsible for deploying technical methodologies for client projects, such as functional/technical requirements, design topics, code review and testing procedures

Frequent interaction with management and support teams on project status and priority setting

Research new solutions, tools and methodologies that may improve the overall operation model, process and/or the result of the project or projects at hand

Employ extreme attention to detail and flexibility to adapt to dynamic client environments and changing business, operations and technology priorities
