Join Serigor Inc and be part of a company that empowers businesses through strategic IT consulting, outsourcing services, systems configuration, and IT life cycle management. 100% WFH available Work Hours - US EST shift timings

Position Overview: We are seeking a highly motivated and experienced AI Project Manager to join our dynamic team. The successful candidate will be responsible for researching, conceptualizing, and delivering innovative AI project ideas to propel the company's technological advancement. The AI Project Manager will play a crucial role in identifying opportunities for AI implementation, leading project teams, and ensuring successful project delivery.

Key Responsibilities: 1. Research and Analysis: Conduct in-depth research on emerging trends, technologies, and advancements in the field of artificial intelligence. Analyze industry best practices and competitor activities to identify opportunities for AI integration in the

company's projects.

2. **Ideation and Conceptualization:** Collaborate with cross-functional teams to generate creative and feasible AI project ideas aligned with organizational goals. Develop detailed project concepts, outlining scope, objectives, deliverables, and potential impact on business operations.
3. **Project Planning and Initiation:** Collaborate with stakeholders to define project goals, scope, and deliverables. Develop comprehensive project plans, including timelines, resource allocation, and risk management strategies.
4. **Team Leadership:** Lead a multidisciplinary team of AI professionals, including data scientists, engineers, and domain experts. Foster a collaborative and innovative team culture, promoting knowledge sharing and skill development.
5. **Resource Management:** Allocate resources efficiently to ensure the timely completion of project milestones. Monitor and manage project budgets, ensuring cost-effectiveness and resource optimization.
6. **Technical Oversight:** Work closely with technical teams to understand project intricacies and provide guidance when necessary. Ensure adherence to AI best practices, ethical considerations, and compliance with relevant regulations.
7. **Risk Management:** Identify potential risks and develop mitigation strategies to minimize project disruptions. Proactively address challenges and pivot when necessary to keep projects on track.
8. **Stakeholder Communication:** Maintain clear and transparent communication with project stakeholders, keeping them informed of project progress and addressing concerns. Conduct regular status meetings and provide detailed project updates.
9. **Quality Assurance:** Implement quality control processes to guarantee the delivery of high-quality AI solutions. Establish and monitor key performance indicators (KPIs) to assess project success.
10. **Documentation:** Ensure comprehensive documentation of project requirements, processes, and outcomes. Facilitate knowledge transfer within the team and with relevant stakeholders.

Qualifications: Bachelor's or Master's degree in Computer Science, Engineering, or a related field. Proven experience in project management, with a focus on AI or machine learning projects. Strong understanding of AI technologies, including machine learning, natural language processing, and computer vision. Excellent leadership and team management skills. Effective communication and interpersonal abilities. Familiarity with agile methodologies and project management tools.

Preferred Skills: Familiarity with agile project management methodologies. Experience with AI project development tools and frameworks. Knowledge of ethical considerations and regulatory requirements related to AI.

If you're passionate about driving innovation through AI projects, have a knack for project management, and possess strong technical acumen, we invite you to apply and join our dynamic team
