

Application Engineer for Dental CAD/CAM and Automation CAM Software (m/f/d)

Apply Now

Company: ModuleWorks GmbH

Location: India

Category: architecture-and-engineering

ModuleWorks GmbH

At ModuleWorks we develop software components for the CAD/CAM industry, which are used to control and simulate CNC machines and robots. With over 200 employees and more than 70% of the world market share we are the leading company in this field. We are proud to have won the „Great Place to Work“ award every year since 2014 as one of the best employers in Germany.

To strengthen our team, we are looking for **Application Engineer for Dental CAD/CAM and Automation CAM Software (f/m/d)** .

„Silicon Valley of mechanical engineering“ – that's Aachen! Do you want to help organizations leverage ModuleWorks technology to secure their future in digitalization, of Industry 4.0 or Industrial Internet of Things? As a strong team, we work at the frontier of what is possible and form the spearhead of manufacturing technology development in the Digital Dentistry sector.

Your Responsibilities:

Responsibilities in the areas of customer support and quality assurance as well as cooperating on the development of products and features

Support and quality assurance for international customer projects before and after software releases

Identify new feature requirements and support their implementation. Validate new

developments and help to market them to customers

Develop CAM Machining Template

Develop application scenarios for automated testing and carry out functional, safety and performance related testing

What we are looking for:

Several years' (min. 2-3 years) experience with CAM software as an application engineer or similar position

In-depth knowledge of CNC machines and multi-axis milling processes. Ideally you have:

Knowledge of milling, grinding and additive processes in dental CAD/CAM

Experience with dental CAD/CAM and aligner software (e.g. exocad, 3Shape, OnyxCeph, Maestro)

Experience with automated CAD/CAM solutions and NC programming on CNC controls

Experience in developing CAM Machining Templates and Post-Processors for CNC machines is an advantage

Interest in software testing, further development of existing or future products and customer support

You enjoy communicating with various internal and external stakeholders

A communicative nature and a solution-oriented way of thinking

Good English communication skills

Other languages such as German, Chinese and Korean are an advantage

We offer

An innovative and dynamic team with a strong emphasis on cooperation

A family-friendly working environment with mobile working options

Modern software development with Jira and GitLab based on the Kanban method

An attractive salary model

Personal and professional development through workshops and seminars

The opportunity to participate in numerous research projects

Free sports and language courses as well as free meals in the company canteen

An internationally oriented company with employees from 17 nations
