Automotive Testing

Apply Now

Company: Opalforce Inc

Location: India

Category: architecture-and-engineering

Job Description

1. Strong programming skills in Scripting Languages (e.g. Python, we use Ruby), with experience in developing test automation frameworks and scripts,

2. Experience with automotive testing tools and frameworks such as Vector CANoe, CANalyzer, or dSPACE ControlDesk,

3. Experience with version control systems (we make use of Git) and continuous integration tools (e.g. Jenkins) is a plus,

4. Proficiency in automotive communication buses such as CAN, LIN, Ethernet, and Flexray and protocols (e.g. DoIP, UDS, SOME/IP, XCP).

5. Strong analytical and problem-solving skills, with the ability to think critically and identify potential risks and issues in software systems,

2. Excellent communication skills, both written and verbal, to effectively collaborate with cross-functional teams and stakeholders,

3. Experience with continuous integration tools and processes, such as Jenkins or GitLab CI, to ensure seamless integration and delivery of software components,

4. Solid understanding of software testing principles, methodologies, and best practices.

1.

2 . Excellent communication and leadership skills, with the ability to effectively communicate complex technical concepts to both technical and non-technical stakeholders,

3 . High-level technical understanding of automotive software, including knowledge of automotive communication protocols, embedded systems, and software development processes,

4 . Experience with defect management systems, such as JIRA or Bugzilla, to track and resolve software defects,

5 . Proven ability to manage and prioritize testing activities and deliver high-quality results within given timelines.

Requirements

1. Strong programming skills in Scripting Languages (e.g. Python, we use Ruby), with experience in developing test automation frameworks and scripts, 2. Experience with automotive testing tools and frameworks such as Vector CANoe, CANalyzer, or dSPACE ControlDesk, 3. Experience with version control systems (we make use of Git) and continuous integration tools (e.g. Jenkins) is a plus, 4. Proficiency in automotive communication buses such as CAN, LIN, Ethernet, and Flexray and protocols (e.g. DoIP, UDS, SOME/IP, XCP). 5 Strong analytical and problem-solving skills, with the ability to think critically and identify potential risks and issues in software systems, 4. Excellent communication skills, both written and verbal, to effectively collaborate with cross-functional teams and stakeholders, 5. Experience with continuous integration tools and processes, such as Jenkins or GitLab CI, to ensure seamless integration and delivery of software components, 6. Solid understanding of software testing principles, methodologies, and best practices. 1. 2. Excellent communication and leadership skills, with the ability to effectively communicate complex technical concepts to both technical and non-technical stakeholders, 3. High-level technical understanding of automotive software, including knowledge of automotive communication protocols, embedded systems, and software development processes, 4. Experience with defect management systems, such as JIRA or Bugzilla, to track and resolve software defects, 5.

Proven ability to manage and prioritize testing activities and deliver high-quality results within given timelines.
