

Cellular 5G/4G RF Engineer

Apply Now

Company: Anicalls (Pty) Ltd

Location: Mumbai

Category: computer-and-mathematical

• Knowledge of mobile communications in 4G/5G 3GPP protocols and PHY layer radio aspects• Knowledge of communication theory, Wireless standards, Radio architecture and Interfaces• Experience with control of RF transceiver and RF front end components for 4G/5G data path processing• Experience with using RF Test equipment for RF validation and debugging and proficiency with debugging in embedded software systems. Familiarity with JTAG and ETM Trace tools. • Understanding of RF calibrations for gain error and techniques for compensating RF impairments. • Understanding of design principles to meet tight real-time deadlines is a plus. • Deep understanding of software engineering principles, and core computer science fundamentals. • Working knowledge of computer architecture with particular emphasis on the HW/SW interfaces of wireless communication systems.
