

Data Scientist Job

[Apply Now](#)

Company: YASH Technologies

Location: India

Category: computer-and-mathematical

Job Description

2 to 4 years of progressive experience with data intensive systems and applications.

Collaborate with data scientists, understand currently deployed ML products and develop application frameworks to run and operate ML products at scale

Must have:

Proficiency with SQL and data modelling.

Excellent command of Python and scripting.

Experience with database technologies (Snowflake,SQL)

Hands on experience with ETL/ELT tools (Snowpipe, Snaplogic, AWS S2)

Nice to have:

Experience with database technologies (Big Query, Google Analytics)

Experience with BI Tools including Power BI and Tableau

Candidate should have good oral and written communication skill.

Let me know if you need any other details. Knowledge on marketing analytics projects will be an added advantage.

At YASH, you are empowered to create a career that will take you to where you want to go while working in an inclusive team environment. We leverage career-oriented skilling models

and optimize our collective intelligence aided with technology for continuous learning, unlearning, and relearning at a rapid pace and scale.

Our Hyperlearning workplace is grounded upon four principles

Flexible work arrangements, Free spirit, and emotional positivity

Agile self-determination, trust, transparency, and open collaboration

All Support needed for the realization of business goals,

Stable employment with a great atmosphere and ethical corporate culture
