Company: Oracle

Location: bangalore

Category: other-general

Oracle is hiring for ERP Fusion Consultant.

Job location - Bangalore, Hyderabad, Gandhinagar, Chennai, Mumbai, Pune

Looking for an experienced ERP consulting professional who understands solutions, industry best practices, multiple business processes or technology designs within a product/technology family. Operates independently to provide quality work products to an engagement.

Oracle is leading the digital revolution. We are building a customer platform delivering leading standard practices , services automation to realize tangible business outcomes and accelerate customer success. Join us and play an instrumental role in coordinating the software that will have a truly global impact.

What You'll Do

Solve the kind of enthralling, high-scale challenges that engineers live for. An experienced consulting professional who understands solutions, industry standard processes , multiple business processes or technology designs within a product/technology family. Operates independently to provide quality work products to an engagement. As an ERP Consultant you will:

- Pre-config ERP application (Fin, Supply Chain business processes) with standard set-ups

- Innovate and continuously improvise pre-configuration solutions and methods
- Maintain and enhance pre-configured solutions to align with Fusion Releases by developing expertise on new features

What You'll Bring

Your eternal curiosity and impressive problem-solving ability will help us reimagine the future of technology. You have that rare combination—a sharp technical brain and a head for business. You'll use this to help customers achieve real-world success with our products.

We also look for:

- 10+ years of overall experience with ERP Applications with recent 5+ years of Consulting Experience of implementing Oracle Cloud – Fusion Apps and at least 3 end-to-end implementation engagements
- Good understanding of ERP Business Processes and industry standard methodologies
- Strong Solution Designing skills with solid understanding of integration impact on other modules and other applications
