Description:

Technical Project Manager

Experience Level: 6-8 Years

Location : [Bengaluru]

Job Description

We are seeking a highly skilled Azure Databricks Tech Project Manager with 6 to 8 years of experience to manage our data engineering initiatives and drive the development of scalable and efficient data solutions on Azure Lead a team of data engineers in designing, developing, and deploying data solutions using Azure Databricks and Azure Synapse Analytics.

• Architect end-to-end data pipelines to support data ingestion, processing, storage, and analytics requirements.

• Collaborate with cross-functional teams including data scientists, analysts, and business stakeholders to understand data requirements and translate them into technical solutions.

• Provide technical leadership and guidance in implementing best practices for data engineering, performance optimization, and data governance.

• Design and implement data integration strategies leveraging Azure services such as Azure Data Factory, Azure Blob Storage, and Azure SQL Database.

• Develop and maintain documentation for data architecture, data flows, and data governance policies.

• Mentor team members, conduct code reviews, and foster a culture of collaboration and continuous improvement.

• Stay updated with the latest Azure data technologies and trends, and evaluate new tools and frameworks to enhance data Bachelor's degree in Computer Science, Engineering, or a related field.

• 6 to 8 years of experience in data engineering and development, with a focus on Azure cloud technologies.

• Extensive hands-on experience with Azure Databricks, Apache Spark, and PySpark.

• Strong proficiency in SQL and experience with Azure Synapse Analytics (formerly SQL Data Warehouse).

• Solid understanding of data warehousing concepts, dimensional modeling, and ETL/ELT processes.

• Experience leading technical teams, driving project delivery, and mentoring junior developers.

• Deep understanding of Azure cloud services such as Azure Data Lake Storage, Azure Cosmos DB, and Azure SQL Data Warehouse.

• Knowledge of data security, encryption, and compliance standards in Azure.

• Excellent problem-solving skills and ability to architect scalable and resilient data solutions.

• Strong communication skills and ability to articulate technical concepts to non-technical stakeholders.

• Experience leading cross-functional teams to complete projects with multiple dependencies and constraints

• Experience defining projects, identifying risks, managing cost, coordinating scope, identifying dependencies, scheduling and deploying new products and features

• Experience creating and cascading processes through an organization

• Knowledge of SQL

• Experience using Jira

Preferred Qualifications

• Azure certifications such as Azure Data Engineer Associate or Azure Solutions Architect Expert.

• Experience with other Azure services such as Azure DevOps, Azure Kubernetes Service (AKS), or Azure Functions.

• Knowledge of data visualization tools such as Power BI, Tableau, or Apache Superset.

• Familiarity with Agile methodologies and DevOps practices.

• Experience working in regulated industries such as healthcare, finance, or government.
