Company: Recruiting Bond

Location: Bangalore

Category: computer-and-mathematical

Funding Details : Boot-Strapped Job Location : Bengaluru (Hybrid), JBR Tech Park,

Description :We are seeking a Frontend Engineer who is ready to roll up their sleeves and dive into the unique challenges of a high-growth startup. You will be instrumental in building user interfaces that are not only functional but delight users at every high-quality, responsive web applications focusing on front-end technologies. Collaborate with designers to translate UI/UX designs into functional user interfaces. Ensure cross-browser compatibility and adherence to web standards. Familiarity with techniques for implementing skeletal preloaders to enhance user experience during content loading. Conduct thorough testing and debugging to ensure the reliability and robustness of the front-end code. Work closely with back-end developers to integrate front-end components with server-side logic. Stay updated on emerging front-end technologies and industry trends, and incorporate them into our development process. Participate in code reviews and provide constructive feedback to peers. Communicate effectively with team members to clarify requirements and provide status updates on project in front-end web technologies, including HTML5, CSS3, and JavaScript (ES6+). Experience with front-end frameworks/libraries like React Native and ReactJS. Solid understanding of UI/UX principles and design patterns. Experience with responsive design and mobile-first development. Familiarity with version control systems (e.g., Git) and package managers (e.g., npm). Experience using libraries or frameworks such as React Content Loader. Experience with UI/UX design tools like Sketch, Adobe XD, or Figma. Experience with testing frameworks (e.g., Jest, Mocha) and methodologies (e.g., TDD, BDD). Knowledge of front-end build tools (e.g., Webpack, Gulp). Ability to work independently and as part of a team in

a fast-paced environment. (ref:hirist.tech)
