Java Software Engineer – IIT Graduates

Apply Now

Company: KOTH Gaming

Location: india

Category: other-general

LocationIndia (Remote) with the potential of UK visa work sponsorship for relocation to HQ in LondonSalaryCompetitive salary with bonus (cash and equity)RequirementApplicants must have graduated from an IIT (Indian Institute of Technology) institution, ideally in Computer Science, for their undergraduate studies. Outside of IIT, we consider applicants from one of the following universities for applicants who specialized in Computer Science for their undergraduate studies:VIT UniversityAmrita UniversityIndian Institute of ScienceThapar Institute of Engineering and TechnologyInternational Institute of Information Technology, HyderabadAmity UniversityIndraprastha Institute of Information Technology, DelhiKL UniversityChaudhary Charan Singh UniversityAnna UniversityUnfortunately, due to exceptionally high demand, we apologize and are unable to consider candidates who do not meet the university requirement at the moment.KOTH GamingKOTH Gaming is a digital platform for fantasy sports betting and gaming headquartered in Fitzrovia, London. The platform offers immersive experiences for enthusiasts from around the world, with daily fantasy sports betting representing a £1 billion untapped opportunity in the UK. The company is committed to innovation, collaboration, and a culture of triumph, with a united global team that strives for greatness.Role DescriptionThis is a full-time remote role for a Java Software Engineer at KOTH Gaming in India with the potential of visa sponsorship to relocate to HQ in London. The Java Software Engineer would play a pivotal role as part of the formative development team and responsible for developing and implementing sophisticated business logic that prioritizes gamification and monetization in the backend, the database alongside real-time market data feeds, and the RESTful APIs. The backend will seamlessly

bidirectionally communicate with the frontend mobile-based and web-based apps, which adopt React and React Native. The successful applicant will work alongside the CTO and frontend developers to build robust and scalable systems and ensure seamless user experiences and will take ownership of projects and leverage cutting-edge technologies that unicorns adopt to deliver meaningful applications to our users.ResponsibilitiesDeveloping the backend with Java alongside the database with real-time market data feeds of a greenfield projectEnsuring the backend has robust RESTful APIs that seamlessly interact with all frontend applications bidirectionallyEnsuring strong collaboration between the frontend and backend teams for a cohesive user experienceDiagnosing and resolving performance bottlenecks on the backend and the databaseRegularly maintaining and optimizing software to ensure high-quality, clean, and efficient applications with a strong emphasis on object-oriented programming and scalabilityQualificationsGraduate from an IIT (Indian Institute of Technology) institution, ideally in Computer Science, or one of the listed universities above specializing in Computer Science for the undergraduate degreeMinimum of two years of professional and proficient experience in JavaExperience with cloud infrastructure and containerization tools such as AWS, Docker, and KubernetesStrong business acumen in iterating over the apps within the Agile framework to achieve product-market-fit ASAP and following which, improving the app from the feedback the product is receiving and ultimately how that affects the business bottom lineExcellent analytical, communication, collaboration skills, and problem-solving skills and the ability to work independently with minimal micromanagementDesirable: Proven experience in building the backend of mobile applications, ideally at least one greenfield one from scratch, that have gained significant traction on the App Store or Google PlayDesirable: Proficiency with React and/or React Native for potential frontend workDesirable: Proficiency in C and/or C++ and/or C#Join Our TeamIf you are passionate about cutting-edge technology, eager to take on challenges, and excited to contribute to the growth of a startup in the booming fantasy sports betting industry, we want to hear from you. At KOTH Gaming, you will have the opportunity to build something from the ground up with a talented CEO/CTO pairing!Equal OpportunityKOTH Gaming is an equal opportunities employer that judges prospective candidates solely based on merit without regard for race, nationality, gender, religion, age, or marital status.
