JOB DETAILS

Job Brief

• Produce financial and market intelligence to aid in business decision making through the development of reporting systems.

• Use and maintain warehouse data to solve organizational problems.

Job Description:

We are looking for a hard-working and organized BI Developer to be responsible for the upkeep and development of warehouse data to support our business decision-making. The BI Developer builds and maintains a data warehouse design to generate reports on financial and market intelligence to aid in business performance monitoring and business decision making.

A successful BI Developer has a strong working knowledge of business trends and is able to read and analyze product, market, and share trends. You should have strong organizational, critical thinking, and communication skills.

Responsibilities:

• Analyzing product, market, and share trends to build warehouse data.

• Translating business needs into technical specifications.

• Developing reporting systems that provide accessible information for decision-making.

• Using warehouse data to generate reports to support business decision-making and business performance monitoring.

• Maintaining data analytics platforms.

• Evaluating and improving existing BI systems.

• Conducting troubleshooting on BI models.

• Generating and delivering quality reports to customers and performing quality assurance checks on reports.

Requirements:

• A Bachelor's degree in computer science, engineering, or related field.

• Experience as a BI Developer.

• Experience in data warehouse design.

• Working knowledge of BI technologies.

• Strong problem-solving and analytical skills.

• Strong attention to detail.

• Ability to work in a team.

• Good communication skills.
