

Magento Architect

[Apply Now](#)

Company: System Soft Technologies

Location: India

Category: other-general

Job Summary: Client is looking for Magento Architect and this is remote position in India. **Responsibilities:** Lead the architectural design and development of complex e-commerce solutions on the Magento platform, ensuring scalability, performance, and maintainability. Collaborate closely with stakeholders to understand business requirements and translate them into scalable technical solutions. Define and enforce coding standards, best practices, and architectural principles within the Magento development team. Architect and implement Magento PIM solutions to optimize product data management and enhance user experience. Design and implement integrations with various web services, third-party systems, and APIs. Lead efforts to optimize system performance, reliability, and security, utilizing caching mechanisms, load balancing, and other techniques. Champion the adoption of cloud technologies and best practices, including containerization (Docker), container orchestration (Kubernetes), cloud-native architecture, and CI/CD pipelines. Mentor and coach junior developers, providing guidance on technical design, architecture, and best practices. Collaborate with cross-functional teams, including UI/UX designers, QA engineers, and project managers, to deliver high-quality solutions on time and within budget. Stay abreast of emerging technologies, industry trends, and best practices in e-commerce and share knowledge with the team. **Required Skills and Experience:** Magento Commerce Certification is mandatory. Proven track record of architecting and leading successful Magento BE development projects. Extensive experience with Magento PIM and product data management. Strong proficiency in PHP, with the ability to design and develop complex solutions. Deep understanding of software architecture principles, design patterns, and best

practices. Demonstrated expertise in designing and implementing large-scale e-commerce systems, preferably in a cloud environment. Hands-on experience with cloud technologies such as AWS, Azure, or Google Cloud Platform. Familiarity with containerization and orchestration technologies, such as Docker and Kubernetes. Experience with CI/CD pipelines and automated deployment tools. Excellent problem-solving and debugging skills, with a strong focus on performance optimization and scalability. Outstanding communication and interpersonal skills, with the ability to articulate complex technical concepts to non-technical stakeholders. Bachelor's degree in Computer Science, Engineering, or related field (preferred).
