JR0265076 Principal Engineer - Development (GMI/AS400)

As the world works and lives faster, FIS is leading the way. Our fintech solutions touch nearly every market, company and person on the planet. Our teams are inclusive and diverse. Our colleagues work together and celebrate together. If you want to advance the world of fintech, we'd like to ask you: Are you FIS?

About the role:

Develop core versions of software application.

Identify client requirements and technical specifications through Product Management and/or client representatives.

Interact with engineering groups to assist in design changes to equipment and/or software.

Research for client to find out the production issues and bugs.

About the team:

We bring together market-leading growth solutions and premiere operational services which primarily serve the investment bank and broker-dealer community with front-to-back best-of-breed solutions.

Our solutions include – Cleared Derivatives, Tax Information Reporting

Data processing volumes require more than a billion transactions to be processed on any given product and that requires employing the latest technology stack and best of monitoring tools.

About 2500 FIS employees around the globe working with our solutions.

Total \$ Billion Annual Revenue

68 of our clients are FIS Top 125 clients.

What you will be doing:

Functional Requirements and perform requirement analysis

Estimate and Monitor Estimates

Work with Business teams to prioritize work

Prepare detailed design documentation

Development/Enhancement/Bugfixes

Handling production issues

Responding to queries raised by various stakeholders

Close co-ordination with boundary partners like Operations/Clients Services etc.

Rotational On-Call Night Support

What you will need:

iSeries Development Expertise in technologies such as RPG/RPGLE, CL/CLLE, DB2/400, SQLRPGLE, Batch jobs, DFUs.

Knowledge of iSeries API's, Data queues, User queues, multi-threading, Journaling and IBM iSeries file systems such as Library based system etc.

Experience with SQL and MQ Series is a plus.

Added bonus if you have:

Proven programming experience

Working in stressed environment

Handling conflicts

Ease of prioritizing

Good communication skills

What we offer you:

At FIS, you can learn, grow and make an impact in your career.

Extensive Health Benefits Program along with the Family Protection Plan

Best-in-class career mobility options across the globe

Award-winning learning offerings for career development

Adaptable home - office work model

Opportunity to work with global teams and clients

Privacy Statement

FIS is committed to protecting the privacy and security of all personal information that we process in order to provide services to our clients. For specific information on how FIS protects personal information online, please see the .

Sourcing Model

Recruitment at FIS works primarily on a direct sourcing model; a relatively small portion of our hiring is through recruitment agencies. FIS does not accept resumes from recruitment agencies which are not on the preferred supplier list and is not responsible for any related fees for resumes submitted to job postings, our employees, or any other part of our company.
