Company: Quartic.ai

Location: India

Category: other-general

About

We are a B2B SaaS industrial-AI start-up in the business of accelerating the adoption of Industry 4.0. In other words, we allow manufacturers to extract more value from their legacy infrastructure and build Smart Manufacturing Factories. We do this with our Smart Industry platform which puts power directly into the hands of subject matter experts (SMEs) and solves key challenges faced by process manufacturing industries when implementing digital transformation. Using Quartic Platform, the SMEs are able to create and deploy AI and IIoT applications to significantly increase productivity and operational performance without the need for proficiency in programming or data science. The Quartic Platform is used by Fortune 100 and 500 companies in pharmaceutical, food & beverage, CPG and other industries for process optimization, predictive maintenance and energy optimization applications.

Responsibilities

Planning out the UX Flows and structure of the features/sub-features that have been assigned to you in great detail while considering all the additional dependencies which may come along with it.

Creating wireframes based on the approved UX flows which go through an engineering review before getting approved for mock-up creation.

Creating mock-ups and HTMLs of the approved wireframes which go through content and product review before getting handed over for development.

Extensive documentation of the work done is a requirement for easier collaboration with the design team and with other teams.

Proficient error-handling is a must. Since we have a complicated enterprise platform, we try to help the user expedite and accomplish their tasks wherever possible.

Requirements

3-5 years of experience in UI/UX Design, preferably in a commercial environment.

Providing an online portfolio showcasing exemplary work in mobile and web design.

Proficiency in the following: Figma, Sketch, Zeplin, InVision, HTML, CSS, Github.

Understanding of CSS frameworks and design systems like Bootstrap or PatternFly.

Ability to deliver sketches, wireframes, mock-ups and documentation based on prior discussions within the team, prior to the set deadlines.

The vision to be able to plan and execute complex features with a great number of interdependencies and multiple levels of abstractions in a seamless manner.

Ability to communicate and collaborate effectively with teammates and other teams.

Inquisitiveness regarding the assigned feature during the planning stages, preferably.

Good to have: Understanding of ReactJS, client-server communication concepts.

What you get:

Unlimited Leaves: We understand the importance of work life balance. That's why we offer unlimited leaves to our employees.

Cutting Edge Technology: Get a chance to work on technology that is at the forefront of the fourth industrial revolution. Be a part of the future, today.

Competitive Compensation: We believe in rewarding our employees for their hard work and dedication. That's why we offer competitive compensation packages.

Flexible Work Hours: We value your time and understand that everyone has their own rhythm. Enjoy the freedom of flexible work hours.

Permanent Work From Home: Say goodbye to the daily commute. We offer permanent work from home options so you can work in the comfort of your own space.
