<p><b>About Company:</b><br/><br/>Client is on a mission to change how the US healthcare industry deals with provider data. Our goal is to reduce the cost of healthcare by streamlining access to provider data and reduce administrative and regulatory burden on healthcare organizations.<br/><br/>They have built an API-first, UI-agnostic, end-to-end provider network management platform automating licensing, enrollment, credentialing, and network monitoring. With direct integrations into 100's of primary sources, we are uniquely positioned to enhance visibility into the entire provider network management process. The team has more than 25+ years of combined experience building provider data systems at Oscar Health and are backed by top-tier VC firms who share our vision of creating a one-of-a-kind healthcare cloud that removes the friction surrounding provider data..<br/><br/><b></b><b>About Role:</b><br/><br/>As a <b>Program Manager</b> in Engineering you will be responsible for sheepherding projects, ensuring cross-functional collaboration is seamless, driving the engineering organization to hit milestones, and owning Engineering-wide metrics. <br/><br/>You will work closely with the SVP of Engineering and the rest of the team to ensure budgets are maintained, risks are identified and mitigated, and schedules are met. The ideal candidate will have a strong understanding of software development methodologies, a proven track record of successful project management, and excellent communication and interpersonal skills.<br/><br/><b>What you'll do:</b><br/><br/>- Lead and manage complex Engineering projects from inception to completion<br/><br/>- Develop and execute project plans that align with the company's strategic goals<br/><br/>- Manage project budgets and resources<br/><br/>- Document the processes and

procedures of different systems for knowledge-sharing<br/><br/>- Collaborate with cross-functional teams to ensure seamless execution of projects<br/><br/>- Own Engineering-wide metrics and report on progress to stakeholders<br/><br/>- Identify and mitigate project risks and dependencies<br/><br/>- Communicate project status and progress to stakeholders regularly<br/><br/>- Facilitate effective communication and collaboration among team members across the R&D team and the organization<br/><br/>- Create and manage project plans that will be incorporated into the R&D roadmap<br/><br/>- Collaborate with functional leads to ensure projects are meeting key milestones and deliverables<br/><br/>- Provide written and verbal communication on project progress and escalate any risks or blockers to the projects<br/><br/><b>What you'll need:</b><br/><br/>- Strong understanding of software development methodologies, such as Agile and Scrum<br/><br/>- Strong written and verbal communication skills<br/><br/>- 3+ years of program management experience or equivalent<br/><br/>- Ability to work independently and as part of a team<br/><br/>- Ability to create project plans for complex initiatives<br/><br/>- Skills to create user flow diagrams<br/><br/>- Understanding of DORA metrics and how to report on them<br/><br/>- Experience with engineering efficiency tools such as Pluralsight, Jellyfish, Uplevel, LinearB, Hivel, or others.<br/><br/>- Familiarity with Jira, Confluence, and other project management and communication tools<br/><br/>- Experience with Gantt charts or other forms of communicating and tracking project timelines<br/><br/>- Experience reporting from cloud data warehouses like BigQuery using SQL<br/><br/>- Excellent time management and organizational skills<br/><br/>- Excellent communication and interpersonal skills<br/><br/>- Strong analytical and problem-solving skills<br/><br/><b>Bonus points if you have:</b><br/><br/>- Previous experience as a scrumwe use:</b><br/><br/>- Google Cloud Platform<br/><br/>- NextJS and NestJS frameworks<br/><br/>- NodeJS and Typescript<br/><br/>- React and Redux<br/><br/>- Auth0<br/><br/>- Git and Github<br/><br/>- Sentry<br/><br/>- Snyk<br/><br/>- Jira</p> (ref:hirist.tech)
