Senior Computer Vision Engineer - Artificial Intelligence/Machine Learning

Apply Now

Company: Where U Elevate

Location: Bangalore/Delhi

Category: computer-and-mathematical

about the job :A highly innovative, fast paced, AI startup is looking for leaders with strong background and knowledge in AI/ ML/Computer Vision to be a part of their amazing team, below are the must have's to be a great fit for the role.- They need to have a solid technical background in AI/ML/CV.- It's a Technical role for a leader.- Programming background is a must, excellent coder is what we enjoy working with.- Detail oriented and be antsy about specifics.- Excellent written, verbal communication and presentation skills,- Excellent analytical skills, Quick problem-solving ability, decision maker.- Has ability to articulate documents and requirement quickly from open speech.- Be able to type fast for documentation / notes / emails to their teams.- Knowledge and usability with JIRA / EPIC's, Excel, Google sheets and Agile Techniques.- Should not work in a solo, loves to work in teams and take leadership.- Ability to take decisions, Need to be able to lead the team, does not shy away from calling the shots.What You'll do : Key Responsibilities :- Design, develop, test, deploy, maintain and improve ML models/infrastructure and software that uses these models.- Manage individual project priorities, deadlines and deliverables.- Prototype and develop deep learning driving systems, perception algorithms on Linux, Java, Android and embedded platforms.- Prototype and develop systems for inference time optimization.- Design, implement, test, and maintain perception software that runs on Vehicles.- Analyze large datasets and work with raw sensor data.- Collaborate cross-functionally with other engineering teams and communicate your work to colleagues and management.- Computer vision & software development.- Perform Multi-Object Tracking & Multi-Sensor Fusion.- Sensor calibration & Perception algorithms.Essential Requirements :- Bachelor's / Master's degree in Computer

Science, or related technical field, or equivalent work experience.- Minimum 4 years of relevant work experience (Machine learning/ Artificial Intelligence/Computer Vision/Deep learning)- Experience designing and implementing distributed software systems (e.g Java, C++, or Python)- Research or Industry experience in Artificial Intelligence, Computer Vision, Machine Learning (ML) models, ML infrastructure, Natural Language Processing or Deep Learning.- Experience in working with software development in embedded real time systems.- Excellent C/C++ programming and software design skills.- Advanced experience in CUDA.
