Category: computer-and-mathematical

Senior Manager - Data Product Services Location – Hyderabad #LI Hybrid

About the Role: Primary responsibility is to support strategic business projects for Novartis Group, the CEO and the Executive Committee, with the aim of maximizing economic value and securing future competitive advantage. Support Senior Strategy Managers and Directors in projects around key Novartis products in major markets, that -Deliver substantially greater outcome improvement than from the product alone. Deliver substantially greater financial rewards for Novartis based on this.

Key Responsibilities:

- Bring deep domain understanding in Pharma Industry. Provide leadership to different AGILE teams in DaaS and collaborate closely with Scrum Masters and Product teams
- Provide technical leadership in data management to the team and be able to roll up sleeves to perform hands on technical work as needed.
- Define and shape specific data/ analytics use cases by working closely with stakeholders in Novartis business domains. Build trusted partnership with the stakeholders.
- Manage quality and consistency of NBS CONEXTS data services delivery to all stakeholders
- Ensure compliance with GMP and regulatory requirements and continuous improvement of quality relevant processes within area of responsibility
- Provide leadership and decision making support by establishing appropriate project governance & communications. Managing risks, issues and change management.
- Ensures projects comply with best practice and internal process framework and continually strive for improvement. Captures lessons learnt throughout the project to benefit other projects and programs in the future. Ensure project operational metrics are rightly captured, review and report the same to the organization leaders.
