Apply Now

Company: Strategic Talent Partner

Location: India

Category: computer-and-mathematical

<p>Brief Job Description :

We are looking for a Senior Software Quality Assurance (SQA) engineer with around 6+yrs of experience in Defining Test Plan/ Strategy, Designing/Implementing Functional, Non-Functional Tests, ability to debug and isolate issues of on-premises / cloud applications. Engineer should also be well versed in Test Automation of on-prem application or cloud applications using Automation frameworks.

As a Test Engineer, should also monitor all stages of software development to identify and resolve system malfunctions to meet quality standards. As well perform assessment of defects that are found by customers and identify opportunities proactively to enhance the Overall Product Quality.

Key Responsibilities :

- Review Product requirements /Use Cases, Design specifications and provide timely and meaningful feedback

- Derive/Design Test Plan/Test Scenarios and Test Cases and ensure overall test coverage for the End-to-End Test Coverage

- Guide and assist junior Engineers in the Team

- Estimate, prioritize, plan and coordinate testing activities

- Design, develop and execute automation scripts using in-house/open source tools

- Identify, record, document thoroughly and track bugs

- Pro-actively Perform thorough Regression testing when bugs are resolved

- Track quality assurance metrics, like defect densities and open defect counts</p> (ref:hirist.tech)
