

Software Quality Engineer - III(Automation)

[Apply Now](#)

Company: NCR Voyix

Location: hyderabad

Category: other-general

NCR Voyix:NCR VOYIX Corporation (NYSE: VYX) is a leading global provider of digital commerce solutions for the retail, restaurant and banking industries. NCR VOYIX is headquartered in Atlanta, Georgia, with approximately 16,000 employees in 35 countries across the globe. For nearly 140 years, we have been the global leader in consumer transaction technologies, turning everyday consumer interactions into meaningful moments. Today, NCR VOYIX transforms the stores, restaurants and digital banking experiences with cloud-based, platform-led SaaS and services capabilities.

Job Description In these times, Convince, Fuel, Retail(CFR) rely on technology as never before. We at NCR CFR, the leading provider of Convince, Fuel, Retail Technology, are not resting on our laurels. We're hard at work extending the reach and capabilities of our CFR technology, ensuring that stores may engage with their customers in any manner they choose – increasingly, this means digital, mobile, contactless, curbside. CFR of the future? Not at NCR. We're building it today. Do you want to join a team that is committed to disrupting a major industry? If so, NCR CFR may be the opportunity for you. We're looking to add depth to our NCR CFR team. As a senior member of the quality engineering team, you'll be responsible for adding momentum to our efforts to modernize and evolve the industry's most widely deployed systems. You'll ensure our code is testable, through your upfront participation in design reviews and code walkthroughs. As an evangelist for engineering quality, you'll be on point to ensure that the project team understands testing process and error documentation. You'll be an advocate for the use of test automation tools and techniques. Working with software engineers, your test plans will ensure that our test cases cover the entire scope of user stories delivered in every sprint. We're looking for

someone who values the big picture but understands the importance of executing now. Because so many transactions are riding on the quality of our technology, you'll bring a passion for ensuring that our customer experience is peerless. Join us on the ground floor of The New NCR – a software and services innovator. We offer great opportunities and an attractive compensation package including bonus and the chance to work on a team of stellar people.

Position Summary & Key Areas of Responsibility

- Automate tests using homegrown and/or open source test frameworks.
- Collaborate across teams to develop solution-based test plans and ensure that feedback from different stakeholders is incorporated.
- Maintain a high-level understanding of other NCR product lines to assess their impact on the overall solution.
- Flexible to work in different areas like Backend, UI and API testing.
- Work towards sustaining current processes and implementing new ones.
- Manage and maintain the QA environments and also plan for the future improvements and support in the planning.
- Analyze user stories and business process requirements to estimate quality risks.

Basic Qualifications

- Strong knowledge of scripting and programming languages such as PowerShell, Python, Java, C++, etc.
- Experience in testing front-end, back-end and API components of cloud-based and/or client/server products.
- 7+ years of professional software testing experience.
- Excellent analytical, problem solving, and communication skills.
- Strong knowledge of Agile development practices (especially Scrum), methodologies and tools.
- Expertise in Database concepts and testing using SQL/NoSQL.
- Experience with web services REST/SOAP API test automation.
- Performance & functional test automation experience.
- Experience with web based testing tools like Cucumber, Selenium, Protractor etc.
- Experience in SCM like Git, CI/CD tools like Jenkins.

Preferred Qualifications

- Demonstrated experience in Quality Assurance processes, procedures, and standards.
- Demonstrated ability to master technical details of multiple complicated software solutions; understanding technical and usability aspects as they related to quality and usability.
- Self-directed individual who can manage multiple projects simultaneously.
- Excellent time management skills.
- Detail oriented with a strong focus on quality.
- Strong customer-centric attitude toward both external and internal customers.
- Excellent analytical, problem solving and verbal and written communication skills.
