

## Sr Proj Lead- Cloud

[Apply Now](#)

Company: Anicalls (Pty) Ltd

Location: Bengaluru

Category: computer-and-mathematical

- Provide expert advice and assistance to support the technical, programmatic, and acquisition aspect for the design, development, and procurement and transition to Cloud-based, and hybrid Cloud solutions for NOAAs ground system capabilities to include archive, storage, ingress/egress, ground system mission operations processing. Requires specific mission knowledge considering satellite and ground system operations, maintenance, and sustainment methods and applications for on-premise systems, and their capability transitions to the Cloud.
- Familiarity with NOAA's mission or equivalent experience in high capacity satellite and ground system deployments, including satellite operations, and high-capacity capabilities for large-array satellite data archival, preservation, and stewardship.
- Provide in-depth analysis of current and future technologies that could support the NOAA NESDIS data and information services missions and advance the implementation of the future common ground architecture
