Company: tsworks

Location: India

Category: computer-and-mathematical

Job Description

tsworks Technologies India Private Limited is a technology products and services company based out of Bangalore, India. We are a subsidiary of The Software Works, Inc, USA. Our mission is to adopt, challenge and set the best practices in Information Technology. At tsworks Technologies India Private Limited , we value our employees, take pride in providing best value in customer engagements, and make every effort to be transparent, responsible, and prompt in our commitments.

Job Summary:

tsworks Technologies India Private Limited is seeking an experienced and highly skilled Technical Project Manager specializing in Data and Analytics to lead and manage complex projects within our organization. The ideal candidate will have a strong background in both project management and data analytics, with a proven track record of successfully delivering projects on time and within budget. The Technical Project Manager will play a crucial role in overseeing the planning, execution, and delivery of data and analytics projects, ensuring alignment with business goals and objectives.

This position will be a contract to perm, reporting to the Senior Manager and work type will be remote.

Responsibilities:

1. Project Planning and Initiation:

Collaborate with stakeholders to define project scope, objectives, and deliverables.

Develop detailed project plans, timelines, and resource requirements.

Conduct project initiation activities, including risk assessment and mitigation planning.

2. Team Leadership:

Lead a cross-functional team of developers, engineers, and integration specialists.

Foster a collaborative and results-driven team culture.

Provide guidance and support to team members, ensuring clarity of roles and responsibilities.

3. Execution and Monitoring:

Oversee the execution of projects, ensuring adherence to project plans and timelines.

Monitor project progress, identify potential issues, and implement corrective actions as needed.

Conduct regular status meetings and communicate project updates to stakeholders.

4. Application Development Expertise:

Leverage expertise in application development methodologies and best practices.

Provide guidance and be a champion of Dev-Sec-Ops and proper release management of product versions.

Collaborate with development teams to ensure the successful implementation of software solutions.

Stay informed about emerging technologies and industry trends in application development.

5.Integration Strategy:

Develop and implement integration strategies for connecting diverse applications and systems.

Work closely with integration specialists to design and implement seamless data flow across applications.

6.Quality Assurance:

Implement and enforce quality assurance processes to ensure the reliability and scalability of applications and integrations.

Conduct thorough testing and validation of software solutions.

7.Risk Management:

Identify potential risks and issues that may impact project delivery.

Develop and execute risk mitigation strategies to minimize project disruptions.

8.Stakeholder Communication:

Communicate effectively with internal and external stakeholders, providing regular updates and addressing inquiries.

Ensure alignment between project deliverables and business goals.

9.Documentation:

Maintain comprehensive project documentation, including project plans, status reports, and lessons learned.

The duties listed above are the essential functions, or fundamental duties within the job classification. The functions of individual positions within the classification may differ. tsworks Canada Inc may assign reasonably related additional duties to individual employees consistent with standard departmental policy.

Key Attributes and Qualifications

Bachelor's degree in a relevant field (e.g., Computer Science, Information Technology, Data Science).

10+ years of relevant experience collaborating with multi-functional teams on business analysis or project management, or software development in retail, supply chain or financial services industry.

Proven experience as a Technical Project Manager, with a focus on application development and integrations.

Hands-on experience in Agile Project Management using Scrum or SAFe is necessary.

Strong understanding of software development life cycle and integration patterns.

Excellent leadership and interpersonal skills.

Project management certification (e.g., PMP, PRINCE2) is a plus.

Proficiency in project management tools and methodologies.

Relevant experience working with JIRA/Confluence, MS Project, Smartsheet etc. is important in this role.

Effective problem-solving and decision-making abilities.

Strong communication and presentation skills.

Experience with GitFlow and Release Management and overall Dev-Sec-Ops principles is essential in this role.

Experience with ITIL principles and handling Service Delivery (Incident, Problem and Change Management) with tools like ServiceNow is a plus.
