Urgent Requirement -ML Engineer

Apply Now

Company: EXL

Location: gurgaon

Category: other-general

Python development including techniques like functions, modules, decorators, context managers, subprocesses and concurrent programming

Use of pytest including monkey patching/mocking of server resources (such as S3 and Teradata)

Creation/maintenance of python packages

Optimization/distribution of ML/Data engineering workflows using tools such as Numba, Ray, Dask and/or PySpark

Test Driven Development – Defining the requirement in a pyunit test then implementing the required function to satisfy that test.

Some limited R programming but may be limited to just executing R code from a python subprocess

Creation of gated checkins until unit tests have "passed", code formatters and linters (ruff, black, pylint) using git pre-commit
