

Vecmocon Technologies - Frontend Developer - React.js

[Apply Now](#)

Company: Vecmocon

Location: India

Category: computer-and-mathematical

Job profile : Frontend developer

Company Description:
We are an IIT Delhi-incubated deep-tech EV startup working in the sustainable and clean mobility space. Vecmocon is making the EV ecosystem smart, connected and reliable by using its state-of-the-art solutions and data-centric approach, to drive the electric mobility and clean energy revolution in India. Vecmocon is founded by the alumni of IIT Kanpur, IIT Delhi and ISB, and is backed by the renowned investors - Tiger Global and Blume Ventures.
We are a young company with futuristic vision and stellar aspirations. There are plenty of learning and growth opportunities within the organization.

We are a passionate team with capable and empathetic leadership, a great working environment and collaborative team culture.

About the job :
Vecmocon is looking for an enthusiastic web developer with primary expertise in Frontend Technologies and UI/UX. The person's primary responsibility will be the development and enhancement of the web platform and reporting framework for visualization and analysis of large scale IOT data being collected from IOT devices. The person is required to have sound knowledge of React with a good learning curve and must be result-oriented. The person must have a personal bend to love designing good looking interfaces.

Responsibilities :

- Develop and implement user interface components for the admin and customer dashboards using React.
- Work on frontend features like login, account management, device listing, user creation and editing, and data visualization interfaces.
- Optimize components for performance and ensure seamless integration with backend services.
- Collaborate with backend developers and

UI/UX designers for feature implementation and usability improvements.

- Identify and address performance bottlenecks and bugs.

Requirements :

- Bachelor's degree in Computer Science or related field.

- Strong proficiency in React, JavaScript, HTML, and CSS.

- Experience in building complex web applications, particularly with admin panels or dashboards.

- Familiarity with RESTful APIs and contemporary frontend development practices.

- Strong problem-solving skills and attention to detail.

- Knowledge of Python-Django would be a plus

- Capability and desire to work in a dynamic and fast-paced environment with minimal direction.</p><p>(ref:hirist.tech)</p>
